**AEROSPACE OPTICS MAKES AVAILABLE EXTENSIVE
LIBRARY OF STANDARD ARTWORK**

Customers May Receive Standard Artwork Parts In Seven Days

FORT WORTH, TX, March 17, 2004 – Aerospace Optics, Inc. (www.vivisun.com), a leading designer and manufacturer of advanced cockpit lighting technologies, including its VIVISUN® line of sunlight-readable LED milspec pushbutton switches and other state-of-the-art display products, announced that the company is now making available to all customers, its extensive library of standard artworks for VIVISUN 95 and LED switches with guaranteed delivery in seven days.

“The large number of standard artworks available with seven day delivery accelerates the customers’ design phase and simplifies part configuration while meeting necessary requirements,” said John Dillow, president, Aerospace Optics, Inc. “We are constantly listening to our customers and this service is another example of how we intend to provide superior customer attention in addition to our products.”

Aerospace Optics provides over 400 standard artworks that are available with LED or incandescent illumination in accordance with the company’s Data Sheets and mil-spec. See our STANDARD ARTWORK LIST to review all of the legends, types and styles available with this convenient delivery of seven days.
