**AEROSPACE OPTICS INCREASES INTERNATIONAL PRESENCE,
PREPARES FOR EBACE**

FORT WORTH, May 7, 2007 -- Aerospace Optics will continue building its international presence this month when its representatives travel to Geneva, Switzerland to participate in the seventh annual European Business Aviation Convention & Exhibition (EBACE) May 22 – 24, 2007.

“We want to continue to build on our reputation of delivering superior products both nationally and internationally,” said Craig Morgan, Vice President of Sales for Aerospace Optics. “Attending EBACE will help us do just that. It is a part of the strategic positioning of our company.”

During the European Convention, Aerospace Optics will occupy booth 1031, where it will display and give out information on its VIVISUN product line. Sales representatives will be on hand to answer questions and take orders. Aerospace Optics is the exclusive manufacturer of the VIVISUN brand of mil-spec lighted pushbutton switches and programmable displays.

“We are excited about the opportunities EBACE will bring,” said John Dillow, Chairman and CEO for Aerospace Optics. “We will present the VIVISUN product line to the international business aviation community, including the VIVISUN LED, the first LED available in 11 sunlight-readable colors and MIL-PRF certified.”

Touted as “Europe’s premiere business aviation event,” EBACE is the only European exhibition to focus exclusively on business aviation. The three-day expo will feature the “latest business aviation products and services from over 300 exhibitors,” according to EBACE, and it expects to draw over 10,000 attendees from all over the world. It will be held at the GENEVA PALEXPO.
