VIVISUN LED RECEIVES QPL CERTIFICATION

Lighted Pushbutton Switch meets MIL-PRF-22885/108

FORT WORTH, TEXAS — Aerospace Optics, a company with a 30-year history of providing cockpit lighting solutions for military avionics platforms, has received notification that the VIVISUN LED lighted pushbutton switch has been listed on the Qualified Products List (QPL) for MIL-PRF-22885/108.

This QPL certification is the result of successful qualification testing in accordance with the requirements of the U.S. Department of Defense.

The VIVISUN LED, which was originally developed at the request of the U.S. Navy, is an advanced electronic switch featuring LED lighting that is both sunlight readable and NVIS compatible. The LED technology eliminates the need for frequent bulb replacement and has been designed with solid state circuitry built to last the life of the avionics platform.

Other advanced features of the VIVISUN LED include Voltage-Controlled Dimming, reduced heat and power consumption, and ten colors, including NVIS Blue and White.

-end-

Note to Editors: Don Guthrie of Aerospace Optics has more than 30 years of experience designing innovative avionics components. He is available to discuss specific technical aspects of the new VIVISUN LED or offer commentary on other technical issues. You can schedule an appointment to speak with Mr. Guthrie by calling Craig Morgan at Aerospace Optics at 817 451-1141, or contact Connie Holubar at Burk Advertising & Marketing at 214 953-0494.
